PROFESSIONAL EXPERIENCE

Full Stack Software Engineer | Nomad Fuel, Toronto, ON (Hybrid) Nov 2025 – Dec 2025

- Developed full stack features for a fuel and logistics platform serving truckers in an agile team, using React, Next.js, Node.js, Nest.js, TypeScript, Prisma ORM with PostgreSQL, Zod for runtime validation and Swagger for APIs.
- Designed and architected features end-to-end in 1-week sprints: scoping requirements, writing design docs reviewed with senior engineers (Jira/Confluence) and delivering production-ready code.
- Translated Figma designs from UX team into pixel-accurate, responsive React/Next.js components.
- Resolved production hotfixes and bugs mid-sprint, leveraging Cursor AI to accelerate debugging in a fast-paced startup.
- Automated batch processing of cards and payment transactions using Python scripts for data handling and reporting.
- Deployed and maintained applications on GCP infrastructure with GitHub Actions CI/CD pipelines.

Software Engineer – AI Evaluator | Outlier AI, Remote Aug 2024 – Sep 2025

- Evaluated LLM code outputs (Python, JavaScript, Java), identifying failure patterns and providing structured feedback to improve model reasoning and code generation.

Software Developer – IAM Analyst | KPMG LLP, Toronto, ON (Hybrid) Nov 2022 – Nov 2023

- Collaborated directly with a large enterprise client to gather requirements, deliver custom automation solutions and ensure alignment with security and compliance standards.
- Developed a Python automation tool for security report generation with data processing and visualization, reducing report turnaround time by 2-3 days and achieving 60-80% efficiency improvement within a 4-week sprint.
- Integrated 100+ applications into client's IAM infrastructure, coordinating with the client and internal teams to complete integration 15% ahead of schedule.

Software Engineer | Contract Positions, Remote Feb 2022 – Sep 2022

Contracts sourced through Riipen, contributing as a full-time developer on each team.

Backend Software Engineer | eWorx (E-Commerce Platform)

- Developed and optimized backend services (Node.js/Express) for a multi-platform e-commerce integrator web application connecting third-party APIs into core MySQL system, enabling real-time data synchronization.

Full Stack Software Engineer | PeerSupport.io (Mental Health Platform)

- Built full stack features (React, Node.js, Express, PostgreSQL) for live mental health platform as part of an agile team, implementing RESTful APIs handling sensitive data with privacy-first design.
- Participated in agile sprints with peer code reviews, delivering high-quality code deployment within tight deadlines.

Backend Software Engineer | Behaiviour (Mental Health / Analytics Platform)

- Migrated Redux state management to React Query and centralized data access patterns (TypeScript, Google Firestore), reducing database calls by 30-40%, enhancing code modularity and reducing infrastructure costs.

Full Stack Engineer Intern | Romh's Educational Services, London, ON (Remote) Jul 2019 – Dec 2019

- Built a full stack web application that automated 50% of a tutoring business's processes, reducing manual workload.

Software Developer / Data Analyst Co-op | London Hydro, London, ON (Remote) May 2018 – Aug 2018

- Automated data collection from external APIs into internal systems (Python) and developed real-time, data-driven dashboards (Python, SQL, Tableau) used for executive-level business intelligence decisions.

PROJECTS

Scope to Ship | Agent Skills, Claude Code, Spec-Driven Development

- Built an open-source agent skill pack that reduces cognitive debt through flipped interaction: the coding agent gets scope, spec and technical plan approved before writing code, then ships in small, verified slices. Sample App

Anchor: Alexa+ Routine Coach | Node.js, MCP, Amazon Bedrock, Amazon Polly

- Built a self-hosted MCP server for an Alexa+ voice coach that plans days around fixed anchors; its 10 tools answer in under 30 ms while Bedrock adapts routines in the background and Polly provides the voice.

TECHNICAL SKILLS

Languages & Frameworks:	Python, JavaScript/TypeScript, Java, React, Node.js, Express, Next.js, Nest.js
APIs & Integration:	REST APIs, Third-Party Integration, System Integration, Data Migration, Swagger
Databases:	PostgreSQL, MySQL, MongoDB, Firestore, Prisma ORM, Sequelize ORM
Cloud & DevOps:	AWS, GCP, Docker, Kubernetes, CI/CD (GitHub Actions), Linux
AI & Agents:	MCP, Agent Skills, Claude Code, AWS Bedrock, LLM Evaluation, Prompt Engineering
Tools & Methods:	Git, Jira/Confluence, Agile/Scrum, Technical Documentation

EDUCATION

B.Sc. Computer Science & BMOS Business Management | Western University, London, ON 2019

Full Stack Development Diploma | Lighthouse Labs 2022
